

ELEMENTS ROOM: BRAZIL TRIP

SPRING 2025

ELEMENTS ROOM AND CENTROROCHAS: A COLLABORATIVE JOURNEY TO BRAZIL

Elements Room had the privilege of cohosting a trip to Brazil in collaboration with Centrorochas. Joining us on this exciting journey were the Elements Room team and three talented designers who were raffle winners from WestEdge and the Designer Brunch.

The anticipation was palpable as we embarked on this adventure, eager to explore the vibrant culture and stunning landscapes that Brazil has to offer. Our itinerary was packed with inspiring activities, including visits to renowned quarries and factories, where we witnessed the fascinating process of transforming raw stone into exquisite works of art. Our first stop was the picturesque city of Vitória, the capital of Espírito Santo, known for its rich history and stunning coastal views.

EXPLORING BRAZIL'S STONE LEGACY

We were warmly welcomed by Centrorochas, who shared insights into the local stone industry and its significance to the region's economy and culture.

We attended the largest stone showcase in the world, MarmoMac. The vibrant colors and unique patterns of the stones were truly captivating, each piece telling its own story of the earth's history. Walking through the exhibits, we were amazed by the craftsmanship and innovation on display. It was clear that this ancient material continues to inspire modern design and architecture. The event was not only an opportunity to admire stunning stonework but also a chance to connect with passionate artisans and industry leaders who are dedicated to preserving and advancing this timeless art form.

We left with a deeper appreciation for the artistry and dedication involved in the stone industry, and a renewed sense of inspiration for incorporating these elements into our own projects.
